Good afternoon to you both!

Yesterday, you asked about a document referencing individuals associated with the March for Life protest on Friday, Jan. 29, 2021. After further review, the public information unit learned of a document produced by Planned Parenthood of Greater Texas and supplied to the Lubbock Police Department as part of communications prior to the protest. Chief Mitchell believes this is the document Scott was referring to as a "watch list." This document included 13 individuals Planned Parenthood identified as living "in and around the city of Lubbock, while the others are the 'big names' who will be coming in and are listed as speakers at the rallies on Friday and Saturday." Officers assigned to coordinate police operations surrounding the logistics of the march conducted a search using open source methods of the individuals and found that all were publicly associated with the March for Life, West Texas For Life or speakers expected at the events being hosted during the weekend's events. LPD does not maintain lists of protesters identified as pro-life or pro-choice.

Since you have submitted an open records request for emails associated with this question, I would expect that the documentation associated will be provided through that avenue.
